

Subject Index

- A**denocarcinoma, human, 339
 Adenosine, effect of, on secretion, 224-225
 Adenosine 3',5'-cyclic monophosphate, 278
 Adhesion, integrin-ligand recognition and, 93-94
 Adhesion molecules
 gut epithelial, 169
 role for, in T cell: APC interactions, 41-43
 Afferent nerves, activation of, by substance P and calcitonin gene-related peptide, 432-433
 AH/type 2 neurons, 277-278
 Anaphylaxis
 indicators of, 327
 intestinal, brush border surface area and, 381-382
 mast cell-deficient mice exhibit, 81-82
 promotion of, by milk, 335
 Antigen, β -lactoglobulin as, 336
 Antigen presentation, 39-45
 Antigen transport, M cell-mediated, 18-24
 Antigens, epithelial barrier function to, 10-15
 Arachidonic acid, effect of, on secretion, 225
 L-Arginine (see N^G -Monomethyl-L-arginine, Nitric oxide)
Asplisia californica, 3
 Atropine, 238
- B**asophils, IgE bound by, 71
 Blood brain barrier endothelial cells, interleukin-1 and, 359
 Blood flow, gastric mucosal, 130
 Bradykinin, 410
 Brush border surface area, regulation of, 380-385
- C**-kit receptor, production of, 70
 Calcitonin gene-related peptide
 release of, 409
 substance P and, 425-435
 Carcinogenic nitrosamines, increase of, by nitric oxide, 108
 CD4, expression of, by human eosinophils, 118
 Celiac disease
 epithelial human leukocyte antigen expression in, 166-167
 "flat-mucosa" in, 202-204
 major histocompatibility complex class II haplotype DQw2 linked to, 14
 Cells, movement of, across tight junctions, 47-57
- Cellular trafficking patterns, 64-65
 Chloramine, 238
 Chloride ion secretion, antigen induction of, 81
 Cigarette smoke, 410
 Cirrhosis, biosynthesis of nitric oxide and, 128
Clostridium difficile toxin A, 52-54
 Colon, canine, effects of prostaglandin D_2 on, 254
 Contact sensitivity responses, role of mast cells in, 81
 Crohn's disease
 immunological defect in, 13
 vasoactive intestinal peptide in, 449
 Cross-regulation of T helper cell subtypes, 89-90
 Crypt abscess, 56-57
 Cyclooxygenase inhibitors, 236
 Cyclosporin A
 effects of, on leukocyte adherence, 401-402
 induction of mast cells inhibited by, 79
 Cytokines
 accessory, production of, 43
 "alarm," 181
 effect of
 on gut epithelium, 162
 on T84 cells, 228-229
 inflammation mediated by, 210
 production of
 by eosinophils, 77-79
 by mast cells, 69
 release of, by endotoxin, 129
- D**examethasone, induction of mast cells inhibited by, 79
 Diarrhea
 frequency of, in patients with inflammatory bowel disease, 210
 mast cell-enteric nervous system and, 276
 Disease states, tight junctions modulated in, 52-57
- E**ndocytosis, mutants affecting, 33
 Endothelial cells, vasoactive mediators synthesized by, 126-127
 Endothelial leukocyte adhesion molecule, 117
 Endothelin, role of, in intestinal function, 266
 Endothelin-1, 127
 Endothelium, 244
 Endothelium-derived relaxing factor, 127
 Endotoxin, vascular permeability caused by, 129

- Enteric nervous system
 afferent nerves of, 316
 anaphylaxis and, 320–322
 axon reflexes in, 314–315
 calcitonin gene-related peptide in, 427
 colocalization of transmitters in, 310
 control of blood flow in, 314
 control of epithelial functions in, 313
 extrinsic nervous control of, 316, 320
 functional anatomy of, 311
 inflammation and, 322
 intramural reflexes in, 313
 neurotransmitters of, 310
 remodelling of, in inflammation, 449
 synapses of, 443
- Eosinophils, 116–125
- Epidermal growth factor
 brush border surface area and, 384–385
 IEC cell lines and, 150
- Epithelial cell monolayer, 210
- Epithelial cell, inflammation and, 181–182
- Epithelial function, antigen-mediated effects on, 325–333
- Epithelial lines, human, 339
- Epithelium, intestinal
 altered secretion in, 375
 antigen presenting cells and, 39–45
- Ethidium homodimer, 285
- Extracellular matrix, role of, in inflammation, 186
- Extracellular matrix cells, 96
- Extravasation, plasma, 409
- F**
 Fetal small intestine, T cell activation in, 205–206
- Fibroblast, 140–146
- Fibroblast, P2JF, 141
- Fibroblasts, release of prostaglandins from, 244
- Food allergies, 279
- Free radical scavengers, 235
- G**
 Ganglion
 inferior mesenteric, 294–295
 superior cervical, 294–295
- Gastric acid secretion, 353–362
- Gastric inflammation, substance P and calcitonin gene-related peptide in, 430
- Gastric ulcers, inhibition of, by interleukin-1, 360–361
- Gastritis
 chronic, 166
 ethanol-induced, 396–397
- Gastroenteritis, acute, 11
- Gastrointestinal endocrine system, altered release of GI hormones in, 373–374
- Gastrointestinal tract, prostaglandin D₂ and, 248
- Gastropathy, nonsteroidal antiinflammatory drug-induced, 396
- Gene induction, adhesion and, 94–95
- Genes
 inflammatory mediator, 98
 macrophage adherent, 95
- Giardiasis, brush border surface area and, 383–384
- Glucocorticoids, neutral endopeptidase induced by, 411
- Glycoproteins, adhesion, 389–391
- Goblet cell secretion, 193–195
- Granulocyte colony-stimulating factor, 184
- Granulocyte-macrophage colony-stimulating factor, 184
- H**
 H₂ receptors, 279
- Hexamethonium, 238
- Histamine
 effect of, on secretion, 223–224
 ion transport mediated by, 346
- Histamine signals, 275–282
- HIV-1, generation of monoclonal IgAs against, 23–24
- Human leukocyte antigen, epithelial, 162
- Human leukocyte antigen molecules, adhesion molecules and, 158–160
- Human leukocyte antigen system, 157–173
- Human leukocyte antigen-DR, eosinophil, 121
- Hydrodynamic dispersal forces, 394–396
- Hydrogen peroxide, role of, in secretion, 232–239
- Hydroxyl radical, 233
- Hyperdynamic circulation, biosynthesis of nitric oxide and, 128
- Hypersensitivity, rat models of, 325–327
- I**
 Ig superfamily, 157
- IgA, secretory, 27–29
- IgAs, protection of mucosal surfaces with, 21–23
- IgE, binding of, 70
- Immunomodulation in the gastrointestinal tract, 434
- Immunomodulatory actions, substance P and, 426
- Indomethacin, 236
- Inflammation
 chronic, 93–101
 contribution of epithelial cells to, 182–186

- mucosal
 - anatomical changes in, 371-372
 - functional changes in, 372-376
- nerve regeneration and, 5
- Inflammatory bowel disease
 - cell proliferation in, 204
 - diarrhea in, 210
 - enteric nervous system and, 415
 - epithelial human leukocyte antigen
 - expression in, 167-168
 - free radical scavengers and, 235
 - role of nitrogen oxides in, 107-112
 - tissue fibrosis in, 98
 - vasoactive intestinal peptide in, 449
- Inflammatory conditions, pathogenesis of, 172
- Inflammatory mediators
 - fibroblasts and, 140
 - release of, from sympathetic ganglia, 294
- Injury
 - epithelial, 151
 - gastric mucosal, 134
- Integrins, gene expression stimulated by, 98
- Integrity, gastric mucosal, 135
- Intercellular adhesion molecule
 - binding of eosinophils to, 117
 - interactions between accessory molecules on T cells and, 159
- Interferon- γ , effects on tight junctions elicited by, 54
- Interleukin-1
 - central nervous system action of, 354-358
 - effect of
 - in nonsteroidal antiinflammatory drugs
 - gastropathy, 403-405
 - in rabbit small intestine, 267
 - nerve regeneration and, 5
 - peripheral injection of, 358-360
- Interleukin-1 β , effect of, on acetylcholine release, 417
- Interleukin-2
 - effect of, on epithelial cells, 152-153
 - eosinophil function and, 120-121
- Interleukin-10, production of, by Th₂ cells, 90
- Intestinal mucosa, innervation of, 443-444
- Intestine
 - epithelial secretion in, 140-146
 - inflammation of
 - severity of diarrhea and, 210
 - substance P and calcitonin gene-related peptide and, 431
 - integration of systems in, 370-376
 - ischemic, reperfusion of, 396
- Ion transport, effects of prostaglandin D₂ on, 253
- Intraepithelial lymphocytes, 149
- β -Lactoglobulin as antigen, 336
- Lamina propria, function of, as mucosal compartment, 61-66
- Late phase reactions, IgE-dependent, 75
- Leukotriene D₄, chloride secretion stimulated by, 349-350
- Leukotrienes, eicosanoid release of, 295
- Lymphocyte chemoattractant factor, eosinophil CD4 and, 118-120
- M cells, transepithelial transport by, 19-21
- Macrophage colony-stimulating factor, 184
- Macrophage-like cells, location of, in myenteric plexus, 420
- Macrophages, interaction between, and epithelial cells, 149
- Major histocompatibility complex, 157
- Mast cell "knock-in" mice, 75
- Mast cell mediators, influence of, on colonic secretion, 347
- Mast cell-leukocyte cytokine cascades, 77-79
- Mast cells
 - bi-directional communication of, with nerves, 4
 - changes in, in inflamed human intestine, 449
 - development and function of, 69-82
 - effects of, in sympathetic ganglia, 293-307
 - mucosal, 341, 445
 - nerves and, 426, 435
 - peritoneal, 340
 - role of, in gut hypersensitivity, 327-328
 - secretion stimulated by the activation of, 222
 - sensing functions of, 275-276
- Mediators of the mucosal neuroimmune system, 260
- Membrane potential, effect of mast cell activation on, 296
- Mesenchymal cells, 244
- N-Methyl-D-aspartate, neurotransmitters released by, 343
- Mice, mast-cell deficient, 72
- Microvascular blood flow, 409
- Molecules, accessory, on T cells, 159
- Monocytes, chronic inflammation and, 93
- N^G-Monomethyl-L-arginine, 127
- Mucin, gallbladder, 199
- Mucins
 - inhibition of bacterial binding by, 197
 - protective mechanisms of, 196
 - structure-function relationships of, 191
- Mucosal immune system, 61-63
- Mucosal-associated lymphoid tissue, 61-62

Mucus, intestinal, barrier provided by, 190-199

Myeloperoxidase, 234

Myenteric plexus, macrophage-like cells located in, 421

Nerve degeneration, 446-447

Nerve growth factor

- mast cell hyperplasia caused by, 450
- mast cell populations increased by, 74
- nonneuronal effects of, 5-6

Nerve plasticity, 444-445

Nerve regeneration, 447-448

Nerve remodelling, 443-452

Nerve stimulation, 5

Nerves (*see also* Enteric nervous system) enteric, 342

mast cells and, 293

myenteric, 284-290

primary afferent, 428-430

role of, in epithelial reactions, 328-329

Neurofilaments, 448

Neuroimmune interactions, early study of, 4

Neuropeptides, sensory, 135

Neurotoxicity, platelet-activating factor-induced, 288-289

Neurotransmitter, release of, in inflamed rat intestine, 416

Neutral endopeptidase, 409

human recombinant, 411

Neutrophil activation, products of, 391-394

Neutrophil adherence, nitric oxide biosynthesis and, 135

Neutrophil granule-associated proteins, 393-394

Neutrophil-epithelial interactions, 54-56

Neutrophils

density of, in inflamed intestine, 239

inflammatory, 110-111

Nippostrongylus brasiliensis

hypersensitivity reactions caused by, 337

nerve remodelling in rats infected by, 446

Nitric oxide

L-arginine-dependent synthesis of, 106

biosynthesis of, in the gastric mucosa, 126-135

cellular sources of, 106-107

role of, as secondary mediator, 404

Nitric oxide synthase, 131

N^G -Nitro-L-arginine methylester, 127

Nitro-vasodilator, 129

Nitrogen, oxidized metabolites of, 104-105

Nonsteroidal antiinflammatory drugs, 400-406

3H -Noradrenaline, release of, 419

Nordihydroguaiaretic acid, 241

Oral tolerance, abrogation of, 170

Oxygen radicals, interaction of, with mucin, 198-199

Parasitism, physiological nature of, 370-376

Passive molecular permeation, barrier restricting, 47-48

Peptide factors, 148-153

Peptidoleukotrienes, effects of, 260-264

Permeability, antigen-induced, 330-332

Peyer's patch, 428-429

Phagocytes, 239

Phospholipase A₂, 240

Phosphorylation, function of, as a transcytotic signal, 34

Piroxicam, 238

Platelet-activating factor

long-term potentiation and, 304-305

mast cells as source of, 241

myenteric neurons excited by, 284-290

release of, inhibited by interleukin-1, 405

role of, in secretion, 240-244

Poly-Ig receptor, 160-162

Polymeric immunoglobulin receptor, 28

Portal hypertension, biosynthesis of nitric oxide and, 128

Presynaptic inhibition, histamine and, 280-281

Prostacyclin, 236

Prostaglandin D₂

effect of, on secretion, 225-226

effects of, on ion transport, 248-257

responses to antigen restored by, 338

Prostaglandin E₂

action of interleukin-1 β mediated by, 357

responses to antigen restored by, 338

study of, compared with that of

prostaglandin D₂, 248-249

Prostaglandins

eicosanoid release of, 295

histamine release of, 350

paracrine release of, 144

Prostanoid, regulation of gastric mucosal integrity by, 135

Prostanoid receptors, effects of prostaglandin D₂ and, 249

Psychological conditioning, 3

Rate limiting barrier, tight junctions serve as, 47-48

Reactive oxygen metabolites, 391-393

Reovirus, adherence of, to M cell apical membranes, 21

Respiratory viral infections, 411

- S**
Secretion
 chloride, in the lamina propria, 222
 effects of activating enteric neurons, on
 348-351
 gastric acid, inhibition of, 353-362
 immune related, 223
 increased, in diarrhea, 210
 mucus, 194
Secretory component, 160-162
Secretory IgA, 161
Short-circuit current, antigen-induced, 326
Signals
 lamina propria, 65-66
 sorting, in the plgR, 31
Slow synaptic excitation, histamine and,
 277-278
Smooth muscle
 gastric, 134
 intestinal, altered motility in, 374-375
Solutes, movement of, across tight junctions,
 47-57
Stem cell factor, production of, 70
Substance P
 activation of mast cells by, 70
 calcitonin gene-related peptide and, 425-435
Substance P content, effect of human
 interleukin-1 β on, 418
Sudden infant death syndrome, 163-164
Superoxide dismutases, 234
Synaptic responses, 299
- T**
 cell receptor usage, 158
T cells
 fetal small intestine and, 205-206
 $\gamma\delta$, 204
T84 epithelial cells
 effect of mast cell mediators on, 222-230
 P2JF fibroblast cell line and, 141
- Tachykinins, 408
Tetrodotoxin, 236
Tight junctions, movement of solutes and
 cells across, 47-57
Tolerance to antigens, 12
Toluene diisocyanate, 411
Transcytosis, mutants affecting, 33-34
Transforming growth factor- α
 expression of, by eosinophils, 122
 IEC cell lines and, 150
 production of, by mast cells, 69-70
Transforming growth factor- β
 epithelial injury and, 151-153
 expression of, by eosinophils, 122
 IEC cell lines and, 150
Transforming growth factor- β 1, effect of, on
 T84 cells, 229
Transport, transepithelial
 by M cells, 19-21
 of polymeric immunoglobulins, 27-35
Trichinella spiralis
 enteric parasitism and, 369
 hypersensitivity reactions caused by, 337
Tumor necrosis factor, 185
- U**
Ulcer formation, inhibition of, 353, 360
Ulcerative colitis, vasoactive intestinal peptide
 in, 449
Ussing chambers, fibroblasts and T84 cells
 juxtaposed in, 142
- V**
Vascular cell adhesion molecule, 117
Very late activation antigen-4, 117
- Y**
Yersiniosis, brush border surface area and,
 382-383
